Art Unit: 3723

Claims 11-13 and 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 11 and 15 the recitation "the rod located in a position closer to the reference member (R) than the transmission member (29)" is ambiguous since rod (31) appears to be located inside reference member (R) and transmission member (29) appears to be touching the end of rod (31) in Figure 2. In what direction is "closer" being measured?

Claim 14 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/28/06.
